[Eaton's energy audits provide energy-conservation opportunities](#)

Did you know that a typical energy audit, when completed, reduces a facility's energy usage by 20 percent? Eaton's Electrical Services & Systems (EESS) team energy audits play a critical role in reducing operating costs, preparing for cap and trade and reducing energy consumption. Eaton's role as an energy-solutions provider can help sustainability initiatives to

This version of Products & Services emphasizes our industrial and commercial electrical distribution products and services.
