## Introducing the new Magnum SB

Eaton's Cutler-Hammer? Magnum™ SB has been implemented in the panelboard and switchboard product line as the default in switchboards and breakers above 2500A. This low voltage, insulated-case power circuit breaker is designed for the performance and economic requirements of UL? 891 switchboards. Magnum SB breakers are UL 1066 listed for lighter duty.

### Performance

- 100 percent rated at full continuous current
- Three frame sizes to facilitate compact enclosure options
- High withstand breakers for maximum coordination
- Current-limiting fuseless fast-opening breakers with high-interrupting ratings and low energy let-through for reduced arc flash

## Pow-R-Flex low ampere Busway

The new Pow-R-Flex low ampere busway is the latest design in an innovative family of products. The newest in the industry, the Pow-R-Flex provides flexible power distribution solutions for a variety of applications where change and adaption are important. The maximum 600V design uses the latest in extrusion construction, providing appealing aesthetics without compromising heavy-duty performance.

Included are an extruded aluminum housing, two standard color options, shutter mechanism safe plug-in outlets, integral
