

CLIMATE CONTROL SERVICES

Protect Your Automation Investment

Heat is the #1 KILLER of Electrical Components

Your most valuable control components are also your most sensitive. High temperatures prematurely shorten the life of your controllers, VFDs, HMIs, and PCs.

Keep the critical components of your process cool and efficient with IEC Supply's climate control products and services.

INDUSTRIAL CLIMATE CONTROL

We're the only factory automation distributor that sells and services industrial AC units.

Our staff understands the challenges of the production environment. That's why we promise:

- **Spare and new parts in stock**
- **4 hour response time**
- **Strict PPE and safety standards**

The Desert Southwest is tough on controls. IEC Supply stocks a full suite of thermal management products like fans, AC units, filters, and more.
